

QBI

solution for mass distribution of reports or elements Qlikview
powerpoint presentation generator from QlikView
qlikView application generator
google graph generator

mass distribution of reports pdf
scheduler Qlikview documents

distribution of elements Qlikview (XLS, CSV, IMAGE, ...)
filters, drill cycles of dynamic

powerpoint generator for several Qlikview applications

tool burst

appointment and distribution dynamics

qlikview data reduction

send by Mail files

distribution of Pivot Table

qlikview application generator

google graph generator

several export formats
or break:
QVW, QVD, PDF, CSV,
XLS, TCD,
HTML, XML, IMAGE
(PNG), google graph

reducing the cost of your license::

- one Qlikview license to generate your reports
- cost divided by 3 compared to a PDF Report Qlikview
- independent of QlikView Server and Publisher

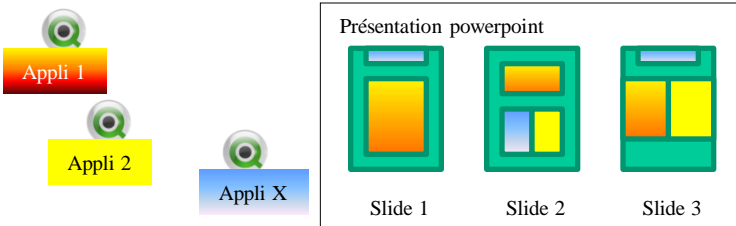

flexible schedule:

- launch from your Task Scheduler

flexible use:

- excel settings
- positioning Smart Filters before generation
- traces of treatment

mobility: QBI is google
graph generator

QBI is a generator of
powerpoint presentations for
several Qlikview documents
with mail distribution and
fragmentation

flexibility of distribution:

- appointment and dynamic location based on cycles
- burst of your applications or PDFs of your reports (Burst), sent by mail

mobility:

- google graph generator
- simple parameterization of the presentation
