

Refresh Application

Open management console QBI.

Click button Actions.

Click to add an action.

Choose your application.

Click button no refresh to active refresh.

The screenshot shows the 'Actions' management console. On the left is a sidebar with categories: Management Console QBI, General Parameters, Actions, and Logs. Below these are various application filters like GENERAL, FILTER, CYCLE, MAIL, QVW, PDF, CSV, HTML, XML, XLS, TCD, QVD, PPT, PNG, BOOKMARK, BURST, APPLICATION GENERATOR, and GOOGLE. The main area features a table with columns for ACT_ID, ACT_NOM, DOC_NOM, and various application types. Below the table is a 'Document' field containing 'C:\DATA\QBI_V9.0\IN\APPLI1.qvw' and a prominent green 'Refresh' button. At the bottom left of the console, it shows 'Mode : Add' and 'ID New : 1'. A green arrow icon is visible at the bottom right of the console area.

Click to save

Refresh

You can test action with the button launch action.

A .bat is created in the directory QBI with the name QBI#APPLI1.BAT with the name of the action.

You can make many refresh if you have the same name for several action.

The name of the action is in the menu GENERAL click the button +.

It's very easy to generate qvd and next in a second action the application with the same name.
